

The SonicWALL PRO 2040

PRO SERIES

Complete business security and configuration flexibility

- **Powerful deep packet inspection firewall**
- **Integrated gateway anti-virus, anti-spyware and intrusion prevention support**
- **Dynamic Domain Name Service (DDNS) support**
- **Global management and reporting**
- **Real-time blacklist spam filtering**
- **Flexible fourth port**
- **Integrated wireless LAN services**
- **Advanced security and networking features such as DMZ, WAN/WAN failover and policy-based routing**

Today's highly connected organizations move vast amounts of critical data across extensive, often complex network topologies. To maintain and safeguard business continuity, network administrators require a solution that gives them the ability to secure their network architecture, while continuing to deliver advanced features and powerful performance.

The SonicWALL® PRO 2040 is a flexible, powerful and easy-to-use total security platform that protects your network resources, increases the productivity of your employees, and keeps your business running—without interruption. Optimized for networks of up to 200 nodes or 50 network locations, the PRO 2040 packs the benefits of the SonicOS operating system into an affordable, rack-mounted appliance, providing advanced security features and configuration flexibility. This highly integrated appliance combines deep packet inspection firewall and IPSec VPN capabilities with support for gateway anti-virus, anti-spyware, intrusion prevention, content filtering and spam blocking to deliver true layered security.

An optional upgrade, SonicOS Enhanced adds a suite of advanced security and networking features, including ISP failover, object-based management, policy-based NAT and more. In addition, SonicOS Enhanced activates a fourth interface that can be configured either as an additional LAN, WAN or DMZ, or as a hardware failover port, ensuring continuous network uptime.

Features and Benefits

Powerful deep packet inspection firewall protects against malicious application layer attacks originating from either internal or external sources

Integrated gateway anti-virus, anti-spyware and intrusion prevention support secures the network against a comprehensive array of dynamic threats including viruses, spyware, worms, Trojans and software vulnerabilities such as buffer overflows, as well as peer-to-peer and instant messenger applications, backdoor exploits and other malicious code

Dynamic Domain Name Service (DDNS) support drastically reduces the costs associated with hosting e-mail servers, Web servers and site-to-site VPN by allowing the use of dynamic IP addresses

Award-winning Global Management System (GMS) provides comprehensive management and reporting tools for simplified configuration, enforcement and management of global security policies, VPN and services, all from a central location

SonicOS Enhanced Firmware Upgrade Adds

Real-time blacklist spam blocking provides the ability to use DNS to query Real-time Black List (RBL) services that track well-known spam and open-relay SMTP servers and to deny SMTP connections from servers that appear on the lists

Flexible fourth port can be configured either as an additional LAN, WAN, WLAN, DMZ or a hardware failover port, offering greater network configuration flexibility

Integrated wireless LAN services enable the appliance to function as a secure wireless switch and controller that automatically detects and configures SonicPoints, SonicWALL wireless access points, as they are added to the network while simultaneously enforcing security policies on all wired and wireless traffic

Advanced security and networking features include WAN/WAN failover, distributed wireless, zone and object-based management, load balancing, policy-based routing, advanced NAT modes, QoS and more

Specifications

SonicWALL PRO 2040

Firewall

Nodes Supported	Unrestricted
Stateful Throughput	200 Mbps*
Deep Packet Inspection	Protection from viruses, spyware, worms, Trojans, and application layer attacks. Requires Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention Service for signature updates
Gateway Anti-Virus Throughput	40 Mbps**
Connections	32,000
Policies	1,000 (SonicOS Enhanced)
Attack Protection	Protection from various DoS, DDoS and scanning attacks

VPN

3DES/AES Throughput	50 Mbps*
Site-to-Site VPN	50 tunnels max
Remote Access VPN	100 tunnels max (10 clients bundled)
Encryption	DES, 3DES, AES (128, 192, 256-bit)
Authentication	MDS, SHA-1
Key Exchange	Manual Key, PKI (X.509), IKE
XAUTH/RADIUS	Yes
L2TP/IPSec	Yes
Certificate Support	Verisign®, Thawte, Baltimore, RSA Keon, Entrust®, and Microsoft® CA for SonicWALL-to-SonicWALL VPN
Dead Peer Detection	Yes
DHCP Over VPN	Yes
IPSec NAT Traversal	Yes, NAT_Tv00 and v03
Redundant VPN Gateway	Yes
Single-arm VPN	Yes (SonicOS Standard)
Topologies	Hub-and-spoke, full mesh

Deep Inspection Security Services

Gateway Anti-Virus, Anti-Spyware and Intrusion Prevention Service	Extensive signature database. Peer-to-peer and instant messaging control and signature updates through Distributed Enforcement Architecture between all interfaces and zones ¹
Content Filtering Service (CFS) Premium Edition	URL, keyword and content scanning ActiveX®, Java Applet, and Cookie blocking ²
Gateway-enforced Network Anti-Virus	HTTP/S, SMTP, POP3, IMAP and FTP, Enforced McAfee™ Clients ³ E-mail attachment blocking
Bundled Features	90 days 8x5/international support, Global VPN Clients and services as described above

Networking

DHCP	Relay, internal server
WAN Modes	NAT and Transparent Modes with static or dynamic addressing
DDNS	Support for services offered by the following dynamic DNS providers: dyndns.org, yi.org, no-ip.com and changeip.com
Authentication	RADIUS, internal user database; LDAP, Active Directory (SonicOS Enhanced)
User Database	250 internal
VoIP	Full H.323v1-5, SIP, gatekeeper support, inbound/outbound bandwidth management, call tracking and monitoring, full interoperability with most VoIP gateway and communications devices

System

Management and Monitoring	Local CLI, Web GUI (HTTP, HTTPS), SNMP v2; Global management with SonicWALL GMS
Logging and Reporting	ViewPoint®, Local Log, Syslog
Standards	TCP/IP, UDP, ICMP, HTTP, HTTPS, IPSec, ISAKMP/IKE, SNMP, DHCP, PPPoE, L2TP, PPTP, RADIUS

Hardware

Interfaces	(4) 10/100 auto-sensing Ethernet, (1) Serial port
Processors	800 MHz x86 main processor, cryptographic accelerator
Memory (RAM)	128 MB
Flash Memory	64 MB
Power Input	100 to 240 VAC, 60-50 Hz, 4 A
Max Power Consumption	65 W
Total Heat Dissipation	241 BTU
Certificates Pending	ICSA IPSec VPN 1.0d ICSA Firewall 4.1, EAL-2, FIPS 140-2
Dimensions	17.00 x 10.00 x 1.75 in 43.18 x 25.40 x 4.45 cm
Weight	8.5 lbs 3.86 kg
Major Regulatory Compliance	FCC Class A, ICES Class A, CE, G-Tick, VCCI Class A, BSMI Class A, MIC, NOM, UL, cUL, TUV/GS, CB
Environment	40-105° F, 5-40° C Humidity 10-90% non-condensing
MTBF	11.2 years

* Testing Methodologies: Maximum performance based on RFC 2544 (for firewall). Actual performance may vary depending on network conditions and activated services.

- 1) 30-day service included
- 2) 30-day service included
- 3) 30-day 10-user service included

** Throughput measured using HTTP throughput test
