

Conference phones for every situation

Konftel 50 – Versatile Conferencing Solutions

The Konftel 50 is the ideal office conference phone. Uniquely designed, the Konftel 50 connects to digital and IP phone sets, cellular telephones and computers. It can also be used with VoIP and other PC audio applications.

KONFTEL FEATURES

- Crystal clear sound provided by OmniSound® technology
- Full Duplex
- 2 year warranty

KONFTEL 50 FEATURES

- Connects directly to your Digital/IP business telephone
- Simple to connect and use
- No extra phone line is required
- Keypad with volume and mute controls
- Can be used with most cellular telephones (cable required)
- Includes PC connection for IP Softphone applications

Now you can hold a meeting anytime – regardless of distance and pressing schedules. Konftel conference units are all equipped with the unique OmniSound® feature – optimal sound for natural, crystal clear communication. Konftel telephone conferencing brings people together and is the ideal alternative to travel.

Make it possible!

The Konftel 50 is easy to connect and use. Uniquely designed it connects to digital and IP phone sets, cellular phones and computers. It can also be used with VoIP and other PC audio applications.

Conferencing via your digital phone set

The Konftel 50 will work with most PBXs by connecting to the handset port on your digital phone set. The included switch box allows you to change between speaking hands-free and using the handset at the push of a button, or connect a headset if you prefer. An analog port is not required to use the Konftel 50. There is no need to re-wire your conference room for analog connectivity.

Conferencing via your cell telephone

By simply connecting an optional cable to your Konftel 50, you can conduct an audio conference via your cellular telephone.

OmniSound® – crystal clear sound

Walk and talk freely around your room with consistent high quality sound. There is no irritating sound clipping, damping or echoes. OmniSound® produces full-duplex natural sound as well as 360° sound pick-up and reproduction. An ultra-sensitive microphone provides omni-directional transmission and three built-in surround speakers provide crystal clear reception throughout the room.

Conferencing via your computer

IP telephony with full duplex! The Konftel 50 can be used with computers (PC/MAC) equipped with IP telephony software for Softphone and other VoIP applications. Simply connect the Konftel 50 to your computer soundcard with cables provided. An optional USB adapter is also available.
